

Windows – Through Fixed

Fixings	Visible
Glazing	4mm to 8mm
Corners	Mitred or Radius
Radius	Minimum 50mm
Trim	Box or Flat Trim

- Our Series 02 Through fixed section is a slightly larger and heavier version of our Series 01. It remains lightweight and elegant and is suitable for Estuary and Coastal offshore vessels.
- This frame section is solidly constructed from aluminium. The fixings are visible on the surface of the frame.
- This section accepts glazing from 4mm to 8mm in thickness, so the window sizes can be larger, heavier and more rugged than Series 01. A range of types glazing is available too.
- Available as fixed, sliding, half drop, hinged or as a hopper window. These have a choice of either mitred or radius corners (min radius 50 mm).
